

Read the Whole Bible This Year

There are 1189 chapters in the Bible: 929 in the Old Testament and 260 in the New Testament. By reading 3.25 chapters a day, a person can read the entire Bible in one year. But, because chapter lengths vary considerably (Psalm 117 is 3 verse and Psalm 119 is 176 verses), following a plan to read a certain number of chapters can vary your reading time each day. An alternative plan is to read a pre-determined number of verses. With 31,173 verses in the Bible, a person will need to average about 85 verses a day read the Bible in one year. The following is a guide to chart your progress through the Bible. But letting God speak to you is more important than checking off boxes. Perhaps, reading comfortable amounts that provide logical breaks in the content is the most satisfying approach to reading the Bible through. Happy reading!
